

REK

Standard clip for group bar G-Rail

Our highly qualified research and development team today is ready to present the fixation system for medical applications of tomorrow. Thanks to the use of advanced graphic and modelling systems like CAD software, our engineers have developed efficient and innovative solutions for any problem related to quick fixation. In fact, Rek is versatile, safe and durable and apart from the formal quality, it presents a second level of coherence: the technological and technical content.

Offering high stability even with the vehicle in motion, Rek allows to fix and organise:

- Sphygmomanometers
- Baskets
- Infusion pole

In conformity with the norms

UNI EN 1789 - Emergency vehicles, their equipment and medical devices

UNI EN 19054 - Rail systems for supporting medical equipment

TECHNICAL DATA

Dimensions	56x60xh90
Weight	0,15 kg
Materials	Nylon

OX07104B

REK 10G
