

RES-Q-VAC

Manual suction device

Compact size manual aspirator of secretions, for the removal of fluids from the respiratory tract or the support system to breathing and infectious material from wounds. The aspirator creates a vacuum that extracts the fluid through the disposable catheter connected to the collection vessel. Doesn't require power sources and can be operated by hand or foot.

Specific features

- Lightweight and compact
- Canister housing with interlocking
- Autoclavable canister with overflow valve
- Disposable antibacterial filter to limit the risk of contamination
- Aspirator base with non-slip inserts
- Metal foot pedal to provide a greater strength and reliability.

Accessories/Consumables

RV71102A	RVX 02 – Autoclavable canister
RV71104A	RVX04 PVC Carrying case
RV71106C	VP FILTER antibacterial filter

Reference standard

EN ISO 10079-2

Technical data

Dimensions	225x165x150 mm
Max vacuum	300 mmHg
Flow	22 l/min
Suction tube length	1300 mm
Canister capacity	400 ml
Materials	PE, PVC, PC, Fe
Weight	1,4 kg

Class IIa med.dev. according to dir. 93/42/CEE

RES-Q-VAC ORANGE - MANUAL
SUCTION PUMP
RV71101A
